

# VALENTINE'S DAY 2026

---

## Tissue Paper Heart Wreath

### SUPPLIES:

Heart shaped wreath form – cut from recycled cereal box or chipboard

Lots of red and pink tissue paper squares

White glue

Paint brush

Pencil with eraser

Ribbon or string for hanging

Embellishments – pom poms, sequins, etc. (optional)

### DIRECTIONS:

1. Use the paintbrush to spread a small amount of white glue on to a section of the wreath (work on about 1/6 of the wreath at a time). Place the eraser side of the pencil into the center of a tissue paper square, and use the eraser to help place your squares on to the wreath form. Continue to work section by section until the entire wreath form is full and covered.
2. Depending on the patience level of your children, you may have to take a break or two and come back to your project later.

*Another alternative is to decorate the small heart (cut from the center of your wreath form) instead. It doesn't take nearly as long to complete, so it's perfect for younger or less patient crafters.*
